Subject: AOL 166, 167 and 168

Alex -

As mentioned after last week's PC meeting, F&R cannot work on these cases due to internal conflicts. I discussed the substance of the cases with Michael yesterday, and gave him an overview of the technology. He seems available to work on them from conflicts and bandwidth perspectives. I've also put a call into Ed Fish to arrange a follow-up meeting to discuss this and other approved disclosures made on his behalf regarding geocoding information. When I talk with Ed next, I'll let him know that Michael will follow-up on these matters unless I hear from you differently.

Thanks,

Karl

Excerpts from 3/5/03 PC Meeting:

AOL 166	2/05/03	Customizing Search Results by Automatically Integrating Personalized Search Parameters Into the Search Strategy	Approved with careful searching.
AOL 167	2/5/03	Customizing Search Results Based on Information Obtained From a Source Identified to the Search Application by the Searching	Approved with careful searching. Address business need to have collaboration among the search application and the 3 rd party ratings/content source.
AOL 168	2/5/03	Customizing Search Results Based on Distance from a Location Associated with a Searcher	Yahoo yellow pages allows you to search for restaurants within 5 miles. Also, MapQuest searching allows you to do the same.
